

SLEEP SCIENCE: AI VIDEO BLUEPRINT

Reverse Engineering TED-Ed Style for Antigravity & AI Automation

A 1-Minute Script and Production Strategy

Script Part 1: The Wake-Up Call

00:00 – 00:15 | The Hook

Narrator: "We've all been there. The alarm screams, your eyes burn, and every cell in your body begs for five more minutes."

Visual: Dark bedroom, a vibrating alarm clock shattering into triangles to symbolize the 'interruption'.

00:15 – 00:30 | The Internal Clock

Narrator: "But why is waking up so hard? Meet your Circadian Rhythm—a 24-hour internal metronome that dictates your energy."

Visual: A surreal melting clock transitioning into a rhythmic pulse of light inside a 2D brain.

Script Part 2: The SCN Conductor

00:30 – 00:50 | The Science

Narrator: "In the center of your brain, the SCN acts like an orchestra conductor, signaling the release of melatonin when the lights go out."

Visual: A conductor silhouette guiding 'melatonin' stars across a navy-blue neural network.

00:50 – 01:00 | The Resolution

Narrator: "Respect your rhythm. Darkness is the cue your conductor needs to start the masterpiece of sleep."

Visual: A person in bed, the screen fades to a cozy, textured night sky. Final Logo.

| 2D Digital Cutout Style

Visual Language

To match TED-Ed, use a **Flat Design** approach with added **Noise/Grain Textures**. This removes the 'artificial' AI look and adds a crafted feel.

Key Elements: Minimalist icons, organic shapes, and a palette of Deep Indigo, Sun Gold, and Charcoal.

Metaphor: The Conductor

Bridging Science & Art

TED-Ed excels at turning complex biology into simple analogies. We avoid showing a 'biological brain' and instead show an '**Orchestra of Light**'.

Using **Claude CLI**, you can prompt the script to focus on these analogies before generating the visual assets in Antigravity.

Base Asset Generation

Scene 1: The Base Plate (Bedroom Environment)

Scene 2: Transition Object (Melting Metronome)

Scene 3: Dynamic Element (Shattering Alarm)

| The Antigravity Workflow

1. Gemini

Scripting & Visual Metaphor
ideation.

2. Claude CLI

Orchestrate file structure &
prompt JSONs.

3. Google Flow

Batch generate image/video
clips via Antigravity.

4. Automation

Bulk import assets into
Canva/CapCut.

Canva: Bulk Automation

Using 'Bulk Create'

1. Export a CSV of your scene scripts and prompt keywords from Claude.
2. In Canva, use **Magic Media** to generate backgrounds or upload Antigravity clips.
3. Use **Magic Animate** to instantly apply "2D Cutout" transitions across all 12 scenes in one click.

CapCut: Precision Polish

03

Keys to 2D Motion

- 📁 **AI Background Removal:** Import Antigravity assets and remove backgrounds to create "Cutout" layers.
- ✂️ **Keyframe metronome:** Manually keyframe rotation for clocks and conductor arms for that 'staccato' TED-Ed feel.
- cc **Auto-Captions:** Use CapCut's AI to overlay stylish, bold typography that mimics professional infographics.

Scene Breakdown & Prompts

Time	Concept	Antigravity Prompt (Visual)	Motion Effect
00:00	Alarm Shock	Exploding vector alarm clock, flat design	Shake + Zoom Out
00:20	The Brain	Neural network glowing amber, 2D texture	Pulse (Opacity)
00:40	Conductor	Silhouette conductor with glowing baton, stars	Rotation (Arm)
00:55	Sleep	Melatonin molecule patterns, dark blue night	Slow Pan Down

Seamless AI Orchestration

By linking Claude's logic with Antigravity's visual generation, you create the **'Puppet Master'** workflow. Each AI tool handles a specific layer—Script, Asset, and Motion—resulting in a professional 2D animation that looks hand-crafted.

Ready to Build?

Next Steps: Claude CLI Scripting -> Antigravity Batch -> CapCut Assemble

➤ Use Claude to generate your Scene.json

▶ Run Flow for 12 key clips

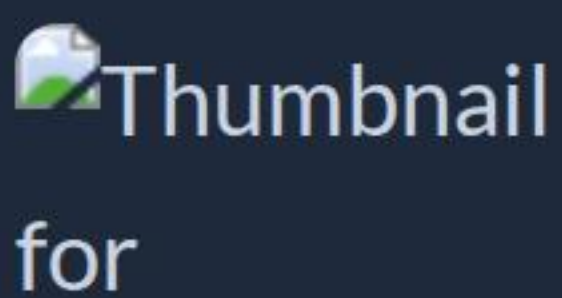

🎬 Merge in CapCut for the final 1-minute cut
